

External Video Capture

Integrate entertainment, 3rd party apps or even a camera

Display any visual source you want with a HDMI capture device connected to the Cloud player

Signage can be entertaining by itself and whilst the Cloud player can play music video, you often require displaying other audiovisual sources. Sport, Quiz, Laptop, Cameras and more can all be displayed through the Cloud player with your signage and branding alongside.

- Really useful in Hospitality, for including sport, quiz's or even a camera on your live acts
- Include 3 part apps off another PC,
- Include the audio and transmit the event across you entire venue
- Bring you signage to life with live picture and surround with promotions
- Your own TV station in house
- Talk to Cloud today to explore the possibilities
