Evolve with new ways of delivering engaging content to customers. Incorporate online streaming services into your Cloud system.

The way that television and other video media is distributed has been evolving for a while. There is a ever increasing reliance on the online streaming platforms to deliver all the content you need. From News to Tv Shows, Sports and E-Sports, Product launches and many more. Streaming online is becoming the norm. Being able to incorporate live streams into your Cloud system, means that you are able to better engage with your customers. Why not use it to launch products nation-wide or keep your customers up to date with the latest trends and offerings. Be empowered with the flexibility of incorporating live streams into your system.

- Simple setup
- Select the display options (differing depending on streaming service)
